

I am just sending this letter as a comment. The reason I am sending this letter is that there should always be choice, if the government tell us what to listen to, what to eat, etc. When do we get to decide what is right and wrong, I thought elected officials, were just elected to represent us, the community. Instead it seems like they represent the companies in our community (who by the way-executives never live in our communities) instead of the people. I am just voicing this because I thikn that if satelite radio subscribers want to listen to a certain topic, message or song they should have the right and you guys should leave it alone...
